New Parking Garage Opens Tomorrow!

After months of anticipation, Midland Memorial Hospital is proud to announce the opening of a new 5-story parking garage on the north side of the campus. Beginning tomorrow, February 1st, 2011, the first four levels of the garage will be open to the public to help ease parking congestion around the campus. The 5th floor will be closed to parking for the next few weeks, until finishing touches to this level are completed. Access to the garage and the Medical Office Building is from Garfield Street, where the campus is now open to traffic. Access from Tennessee Avenue will no longer be available due to a surface parking project that corresponds with the long-term parking plan for the hospital.

The parking garage is the most convenient way to access the Medical Office Building, where Diagnostic Imaging Associates, Texas Oncology, and Permian Cardiology are located. If visitors are trying to access the hospital, continue using the Illinois Avenue entrance. Please note that complimentary valet parking is still available at both entrances to the hospital, and visitors are encouraged to use this free service throughout the duration of the new patient tower project.

Your home for healthcare
